

APP OVERVIEW

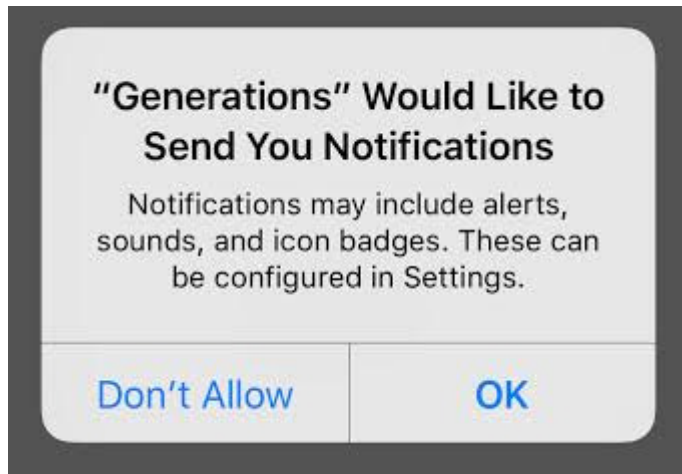

The Generations app is available for download from the [iTunes](#), [Google Play](#), and [Amazon App](#) stores. The app has similar functionality as the mobile websites; only the method of accessing is different. Clients, Caregivers, and office staff can all use the app. You log in with your Agency ID, email address, and password. The app follows security rules established in Company Settings [Security](#) and [Web Portal](#).

Note Regarding Devices: The app is designed to work with current technology. If you have an older model of a device that is no longer supported by the manufacturer, the app may not work for you. For example, if you have an older model of a Kindle Fire, the app would not appear in search results.

Get the app: Search for the app via search terms "Generations Homecare System" or "Integrated Database Systems," or click the banner to get the app for your device.

Regarding Notifications: When the app is installed, agree to the prompt to allow notifications.

Here is an example of a notification.
